You have been asked to create a database for Finlays Catering and Party Services. The company buys catering and party products from suppliers to sell to customers to make a profit.

The database will record information about products and suppliers.

Each product belongs to a product category, e.g. Drinking.

A product may be supplied by more than one supplier.

The pack size and purchase price for a product may be different depending on the supplier.

Each supplier allows Finlays a number of days to pay for products. Finlays only uses suppliers who offer a minimum of 14 days and a maximum of 30 days to pay.
